Important Information for Buyers

All lots are offered subject to Morton & Eden Ltd.’s Conditions of Business and to reserves.

Estimates are published as a guide only and are subject to review. The actual hammer price of a lot may well be higher or lower than the range of figures given and there are no fixed “starting prices”.

A Buyer’s Premium of 15% is applicable to all lots in this sale. Excepting lots sold under Temporary Import rules which are marked with the symbol ‡ (see below), the Buyer’s Premium is subject to VAT at the standard rate (currently 17½%). Unless otherwise indicated, lots are offered for sale under the auctioneer’s margin scheme and VAT on the Buyer’s Premium is payable by all buyers.

‡ Lots marked with this symbol have been imported from outside the European Union (EU) to be sold at auction under Temporary Import Rules. When released to buyers within the EU, including the UK, the buyer will become the importer and must pay import VAT at the rate of 5% on the hammer price in addition to the normal 17.5% on the Buyer’s Premium. Buyers outside the EU will not be required to pay temporary import VAT provided that satisfactory documentary evidence of exportation is obtained. Please note that this information has been updated to reflect changes in UK legislation introduced on 1 September 2006.

g Lots marked with the letter g qualify as Investment Gold as defined by H.M. Customs & Excise. Whilst invoice totals for such lots will be of equivalent value to those for lots sold under the Auctioneer’s Margin Scheme, the VAT on the Buyer’s Premium will be itemized separately.

Morton & Eden Ltd. will be pleased to execute bids on behalf of those clients unable to attend the sale in person, subject to our Conditions of Business. All bids must be submitted in good time in writing and lots will always be purchased as cheaply as possible (depending on any other bids received, reserves and competition in the saleroom). This service is offered free of charge.

Morton & Eden Ltd. can supply quotations for the shipping of purchases, including transit insurance and VAT refund administration fees, and will assist in the application for any export licences which may be required. Buyers are reminded that it is their responsibility to comply with UK export regulations and with any local import requirements.

*Illustrated lots are marked with an asterisk. Additional images of some items may be available online.

Most issues of Felipe II were struck under assayers Bernardo de Oñate (“O”) and Francisco de Morales (“F”). However for a brief period at the end of his reign issues were struck by de Morales jointly with Francisco de Quintana Dueñas (“D”), who then issued some coins under his sole authority, before de Morales returned (see Pérez Sindreu, “Ensayadores”, p.33). All these issues are either scarce or rare.

These should not be confused with another assayer “D°”, Diego de Godoy, who issued coins in the reigns of Felipe III and IV (from 1598 to 1634), whose coins are denoted by a D to the left of the arms.

As Middeldorf wrote in the Morgenroth catalogue: ‘The ostentatious display of rosaries by the angels permits us to assign a date to the plaquette. After the victory of the European sea-powers (Venice among them) over the Turks at Lepanto (Oct 7, 1571), Pope Gregory XIII gave a special status to the Festival of the Virgin of the Rosary (c 1573) and the Venetians began to build the Chapel of the Rosary in SS Giovanni e Paolo (1582ff). It is likely that the plaquette was made in connection with these events. Thus it would be dated after the death of Sansovino and in the lifetime of pupils of his like Gerolamo Campagna and Alessandro Vittoria, who were both active in the enterprise in SS Giovanni e Paolo.’

Indeed, the elongated bodies of the accompanying cherubim, which seem to swim or run in mid-air, can be paralleled in several of Vittoria’s reliefs. A Virgin of the Rosary painted by Palma Giovane for the chapel (but since lost) may have provided the composition for the sculptor-goldsmith who cast and chased this popular plaquette. Fine examples in Berlin, the Metropolitan Museum of Art, New York, and the Correr Museum, Venice (no. 105a) are cast integrally with an elaborate, so-called ‘Sansovino frame’, with projecting scrolls, volutes and strapwork. These plaquettes may have been distributed among members of the Confraternity responsible for the chapel and would have been used in their private devotions.

The marble statue of Handel was commissioned by the owner of the gardens, Jonathan Tyers, in 1737 and unveiled on the first day of the 1738 season, Monday 1 May. As Coke mentions, the London Daily Post of the following day reported: 'The several Pieces of Music play'd on that Occasion had never [been] heard before in the Gardens. The Company express'd great Satisfaction at the Marble Statue of Mr Handel; who is represented in a loose Robe, striking the Lyre, and listening to the Sounds; which a little Boy, carv'd at his Feet, seems to be writing down on the back of a violincello. See Charles Avery's article in *Effigies & Ecstacies: Roman Baroque Sculpture and Design in the Age of Bernini*, exhibition catalogue, National Gallery of Scotland, Edinburgh, 1998, pp 94-95, no 47, fig 68 where it is noted that the infant Hercules is an accurate copy in miniature of a bronze statuette by Alessandro Algardi, which seems to have been cast in some numbers. Avery illustrated the present medal in connection with the statuette from the Burghley House Collection.

That particular statuette (343mm high) in fact belonged to Dr Mead himself and featured in the sale catalogue of his effects in 1755 where it was purchased by the Earl of Exeter for £52 10s. (see Samuel Baker, founder of Sotheby's, auction catalogue, 11 March 1755, p. 219 - where it was described as 'VERCULES infants uncumbens et serpentem strangulans - Algardi opus'). It was illustrated with an engraving as a tail-piece for the third edition of Mead's *A Mechanical Account of Poisons in Several Essays*; London, 1745. Mead had handled vipers to collect their venom for his research. In the same year as the auction sale of Mead's effects, including of course his famous coin Collection, Dr Matthew Maty published *Authentic Memoirs of the Life of Richard Mead M D*, London, 1755 in which he wrote: 'This high pitch of heroism, to which he had wrought himself, is finely represented by an antique statue, in his Collection, engraved on a copper plate at the end of his Book; the figure is a Child in a bold and graceful attitude, holding out by the neck an enraged serpent, with this devise, Labor est Angues Superae'.

Avery has pointed out that Sir Alfred Gilbert's inspiration for this medal almost certainly came from Guillaume Dupré's medal of Marie de Medici (as lot 552); both share common aspects such as their concave obverse fields, the elaborate portraiture and their nautical reverses as well as their identical diameters.

This coin is the latest known Umayyad dirham of Arminiya, and sheds further light on the numismatic and political history of the northern provinces of the Muslim empire. An unbroken sequence of dirhams bearing the mint-name Arminiya runs from 94-110h, reflecting the location of the mint in the provincial capital. Thereafter, minting was disrupted by a series of invasions by the Khazars, so that Michael Bates (‘The Dirham Mint of the Northern Provinces of the Umayyad Caliphate’, Armenian Numismatic Journal XV, 1989, pp. 89-109) knew of no dirhams struck in the northern provinces for the years 111-113h.

The severity of the threat posed by the Khazars at this time is clear from Bates’s account. The year 112h saw an invasion leading to a great battle at Marj Ardabil, where the Muslim governor, al-Jarrah, was killed. Following this success the Khazars advanced as far as al-Mawsil. However, the Muslim forces were able to regroup and defeated the Khazars at Warthan in Adharbayjan, and the new governor, Maslama b. ‘Abd al-Malik, had advanced to al-Bab (probably Darband on the Caspian Sea) by the end of the year. In the following year, Maslama was in a position to take the offensive against the Khazars, ravaging their territory and killing their ruler’s son.

With the Khazars expelled from Armenia, the province seems to have returned to relative calm, to the extent that subsequent governors did not consider it necessary to remain there. Instead, their focus shifted to Arran, the province which lay on the Khazar frontier. By 114h a mint had been established at al-Bab, which is known to have been active for almost all years between 114h and 126h.

This coin was presumably struck after the pacification of Armenia in 113h but before the decision was taken to transfer the mint to al-Bab. While the style of the calligraphy is very similar to the last Arminiya issue in 110h and the al-Bab dirhams of 114h onwards, the annulet pattern differs from both. The significance of these patterns on Umayyad dirhams is still not fully understood, but it is known that changes in their patterns often accompany a change of governor. In this case, it may be that the three double annulets on the present specimen are to be associated with Maslama b. ’Abd al-Malik, while the four double annulets on dirhams of al-Bab struck in 114h onwards refer to his successor, Marwan b. Muhammad.

A year after his accession, al-Ma'mun was faced by a Shi`a revolt in Kufa, led by Abu'l-Saraya (who struck dirhams dated 199h using the title al-
empire. Al-Ma'mun did not remain in Baghdad, whose population had opposed him so vigorously during the siege, but instead returned to Marw
Disagreements arose almost immediately, which had escalated into armed conflict by 195h. After three years of civil war, al-Ma'mun finally
up residence in Marw. Unfortunately, if this division may have been intended to satisfy the ambitions of both, it quickly proved a failure.
Amin and al-Ma'mun. The senior heir, al-Amin, duly became caliph in Baghdad, while al-Ma'mun retained his post of governor of Khurasan and took
Whether prompted by his own religious views, the difficulty of quelling Abu'l-Saraya's rebellion, or a broader desire for reconciliation and
inclusiveness, in 201h al-Ma'mun appointed as his heir the Shi`ite imam `Ali al-Rida, whose name appears on this coin. Al-Rida had previously
Having appointed al-Rida as heir in 201h, al-Ma'mun began to announce the fact on the dirham coinage. In doing so, he was following an
established precedent, since Harun al-Rashid had acknowledged al-Amin on both gold and silver issues, and dirhams struck in the eastern Islamic
lands under al-Amin had borne the name of al-Ma'mun himself. Although the appointment was made in the previous year, the earliest coins to
name al-Rida are dated 202h, presumably because the dies for 201h had already been prepared when the announcement was made. With the
exception of this specimen dirhams with the name of al-Rida are only known from mints in the East (Isbahan, Fars, Samarqand, Marw, al-
Muhhammediya and Naysabur), probably because al-Ma'mun's court was still at Marw and his authority was strongest in this area. The latest issues
are posthumously dated 204h (or possibly 205h), probably because the dies had been prepared before al-Rida's death was announced. Some coins
of 204h also still bear the title of the murdered al-Fadl b. Sahi [the wazir] as responsible.'

Unfortunately, while the appointment of al-Rida as heir seems to have attracted strong Shi`ite support, al-Ma'mun could not win over the solidly
pro-`Abbasid population of Iraq who installed a brother of Harun al-Rashid (and therefore an uncle of al-Ma'mun) as a rival caliph in 202h. This
seems to have prompted an abrupt change of plan, with al-Ma'mun deciding to leave Marw and transferring his court to Baghdad. Later in 202h al-
Fadl b. Sahi, who had been so closely involved with the caliph's religious policy, was assassinated en route, while al-Rida himself died of poison in
the following year. Both deaths were blamed – rightly or wrongly - on al-Ma'mun. When he finally entered Baghdad in 204h, the caliph symbolized
the abandonment of his pro-Shi`a policies by changing the colour of dress at his court from green to the traditional black of the `Abbasids.

Having appointed al-Rida as heir in 201h, al-Ma'mun began to announce the fact on the dirham coinage. In doing so, he was following an
established precedent, since Harun al-Rashid had acknowledged al-Amin on both gold and silver issues, and dirhams struck in the eastern Islamic
lands under al-Amin had borne the name of al-Ma’mun himself. Although the appointment was made in the previous year, the earliest coins to
name al-Rida are dated 202h, presumably because the dies for 201h had already been prepared when the announcement was made. With the
exception of this specimen dirhams with the name of al-Rida are only known from mints in the East (Isbahan, Fars, Samarqand, Marw, al-
Muhhammediya and Naysabur), probably because al-Ma’mun’s court was still at Marw and his authority was strongest in this area. The latest issues
are posthumously dated 204h (or possibly 205h), probably because the dies had been prepared before al-Rida’s death was announced. Some coins
of 204h also still bear the title of the murdered al-Fadl b. Sahi, presumably for similar reasons.

At Makka, the situation is somewhat different. A unique dirham is known for 201h (Lowick 528), naming a certain Muhammad (probably the
governor of Makka, Muhammad b. Ja’far) and the wazir al-Fadl b. Sahi under the title Dhu’-Riyasatayn. Another unique coin struck in 203h
prominently names al-Ma’mun alone (Lowick 529, rev., ‘l-khalifa al-Ma’mun), without mention of either al-Rida or al-Fadl b. Sahi. This new coin
completes the sequence neatly, since it names the caliph, his new heir and also the wazir who was instrumental in his appointment. One can only
speculate why such a piece should have been struck at Makka, which is such a rare mint under the Abbasids. It is tempting to see it as an attempt
to spread news of the appointment as widely as possible among pilgrims (although this involves many assumptions about the role of coinage as
propaganda). It is also perhaps significant that al-Rida himself was living nearby at Medina when his appointment was made.

This remarkable coin sheds further light on al-Ma’mun’s failed attempt to reconcile the Sunni and Shi‘ite strands of Islam, a plan which, had it
succeeded, would surely have changed the course of history.

When the caliph Harun al-Rashid died in 193h, he had decreed that the government of the empire was to be divided between his two elder sons, al-
Amin and al-Ma’mun. The senior heir, al-Amin, duly became caliph in Baghdad, while al-Ma’mun retained his post of governor of Khurasan and took
up residence in Marw. Unfortunately, if this division may have been intended to satisfy the ambitions of both, it quickly proved a failure.

A year after his accession, al-Ma’mun was faced by a Shi`a revolt in Kufa, led by Abu'l-Saraya (who struck dirhams dated 199h using the title al-
leaving a trusted governor in charge of the capital.

Although al-Ma’mun himself was a Sunni, being a member of the `Abbasid family, the first few years of his sole reign as caliph are characterized by
pro-Shi`a policies. The Cambridge History of Islam explains: ‘Following the example of some Shi`i claimants, or even of his `Abbasid ancestors,
[al-Ma’mun] stated that he wished to apply in their entirety the precepts of the Qur’an and of the Sunna of the Prophet…He took the title of imam,
which the caliphs had no longer borne officially since the successful `Abbasid revolution, and he identified his policy with a religious propaganda
(da`wa) for which…al-Fadl b. Sahl [the wazir] was responsible.’

Abbasid, al-Mu’tazz, broad flan dirham, Madinat al-Salam 253h, obv., citing al-Mu’azz (sic), rev., citing al-Musta’in al-Mutaqqi, 2.41g, somewhat crude and with some double-striking, good fine and rare £200-300

The date on this piece is clearly 253h, but this presents problems with the caliphs it cites. Al-Musta’in, whose name appears in the lower reverse field where one would expect the reigning caliph to be mentioned, had died two years earlier in 251h. Al-Mu’tazz, who succeeded him and was in fact caliph in 253h, is named on the obverse where one might expect an heir to be mentioned. However, coins of Al-Mu’tazz struck during his caliphate normally bear the additional title of amir al-mu‘minin, which is missing from this piece, and name him on the reverse. The anomalous legends may indicate that this coin is a contemporary imitation of some kind, but the early 250s were a turbulent period in Baghdad and Samarra and it is possible that this may have led to some confusion at the mint.

The mint name on this specimen is not unambiguous. The letter-forms would be correct for ‘al-khiliifah’, but this seems unlikely unless it were some kind of epithet indicating the palace or city where the caliph then lived. Another possibility might be that the mint-name was intended to be Raqqa or al-Rafiq, but the die-engraver omitted either of the similarly-shaped letters ‘Y’ or ‘q’ from the latter.

Frustratingly, only the bottoms of the letters of the mint and date are legible. Carroll Fenton Wales (1918-2007) was one of the twentieth century's pre-eminent art conservators, devoting his skills almost exclusively to the conservation and restoration of art works of the Byzantine Empire. His passion for this period was all-encompassing, and his remarkable collection of Byzantine coins attests to this.

Mr. Wales was born in Maine and served in the United States Army during World War II in Europe and North Africa. Following the war he attended Harvard College where, at the Fogg Art Museum, he studied Fine Art and Art Conservation under some of the most celebrated conservators of the period.

For the first few years following his graduation in 1949, Mr. Wales worked on a wide range of objects including a Roman mosaic at the Worcester Art Museum, early 19th century murals at Wesleyan University, and early Italian paintings from Yale's renowned Jarvis collection.

In 1952, Mr. Wales, working under the joint auspices of the Byzantine Institute of America and Harvard's Dumbarton Oaks Center of Byzantine Studies in Washington, D.C., began what was to be his lifelong passion for the art and history of the Byzantine Empire. For the next seven years he worked in Istanbul, restoring the frescos in the Parekklesion (which was used as a funerary chapel for the founder and his family) at the former Church of the Monastery of the Chora, the Kariye Çamii, the official summer church of the Emperors. The frescos that Mr. Wales restored were those that had been plastered over by order of the Grandvizier Atik Ali Pasha when he converted it into a mosque in the late 15th/early 16th century.

During this period Mr. Wales also worked on restoring frescos in the greatest of all Byzantine structures, the Hagia Sofia. Mr. Wales joined forces with the late Constantine Tsousis and together they travelled from Mount Sinai, where Mr. Wales worked on the domes in the main part of the church at Saint Catherine's monastery, to Iran and Iraq where he worked with Max Mallowan (husband of the famous murder mystery writer Agatha Christie), as well as the monasteries on Mount Athos. It was at Mount Athos that Mr. Wales developed friendships with the monks which were to last throughout his life.

Mr. Wales's list of professional accomplishments was extraordinary and included his work on the icon of Saint John Klimax at the Saint Catherine Orthodox monastery in Sinai (which was exhibited at the Metropolitan Museum of Art in 2004) and his restoration of the medieval works of art at Castillo Tamarit in Tarragona, Spain. Although Carroll Wales retired in the late 1980's he continued to lecture on his experiences up until 2004, when he last spoke at Columbia University's symposium on the Kariye Çamii.

The collection of coins that Mr. Wales assembled was a lifetime's reflection of his veneration of, and passion for, understanding all things Byzantine. While at one level his collection was a hobby, he approached it with the same dedication and intensity that he gave to his professional assignments. While the riches of gold and silver held their appeal, so too, and perhaps with greater intensity, did the bronze issues. These latter he collected with a diligence that inspires awe. Not only did he aim to collect examples of all the emperors and denominations, but within each sub-section he strove to have examples of all possible mints, regnal years, indictions and officinae. As a result his bronzes number well over 5,000 pieces.

There are a few emperors and some types not represented in his collection. This is not necessarily because Mr. Wales failed in his quest to acquire them, but rather that he made a number of generous donations of carefully selected coins to the Monastery of Iveron on Mount Athos, in an effort to help build a respectable collection for them.

Carroll Wales was a man of Byzantium in both vocation and avocation. His collection of Byzantine coins was a passionate extension of his devotion to better understand a period which for all too many years was either misunderstood or at times actively ignored.

Due to the size and scope of the collection, it is being offered in two sales – the present one and a final offering in November 2008. While all the Byzantine silver coins are being offered in this first auction there will be further gold and bronze coins in the second sale, which will also include his interesting collection of coins of Trebizond.

Conditions of Business for Buyers

1. Introduction
(a) The contractual relationship of Morton & Eden Ltd. and Sellers with prospective Buyers is governed by:-
(i) these Conditions of Business for Buyers;
(ii) the Conditions of Business for Sellers displayed in the saleroom and available from Morton & Eden Ltd.;
(iii) Morton & Eden Ltd.'s Authenticity Guarantee;
(iv) any additional notices and terms printed in the sale catalogue, in each case as amended by any saleroom notice or auctioneer's announcement.

(b) As auctioneer, Morton & Eden Ltd. acts as agent for the Seller. Occasionally, Morton & Eden Ltd. may own or have a financial interest in a lot.

2. Definitions
"Bidder" is any person making, attempting or considering making a bid, including Buyers;
"Buyer" is the person who makes the highest bid or offer accepted by the auctioneer, including a Buyer's principal when bidding as agent;
"Sellers" is the person offering a lot for sale, including their agent, or executors;
"M&E" means Morton & Eden Ltd., auctioneers, 45 Maddox Street, London W1S 2PE, company number 4198353.
"Buyer's Expenses" are any costs or expenses due to Morton & Eden Ltd. from the Buyer;
"Buyer's Premium" is the commission payable by the Buyer on the Hammer Price at the rates set out in the Guide for Prospective Buyers;
"Hammer Price" is the highest bid for the Property accepted by the auctioneer at the auction or the post auction sale price;
"Purchase Price" is the Hammer Price plus applicable Buyer's Premium and Buyer's Expenses;
"Reserve Price" (where applicable) is the minimum Hammer Price at which the Seller has agreed to sell a lot.

The Buyer's Premium, Buyer's Expenses and Hammer Price are subject to VAT, where applicable.

3. Examination of Lots
(a) M&E's knowledge of lots is partly dependent on information provided by the Seller and M&E is unable to exercise exhaustive due diligence on each lot. Each lot is available for examination before sale. Bidders are responsible for carrying out examinations and research before sale to satisfy themselves over the condition of lots and accuracy of descriptions.

(b) All oral and/or written information provided to Bidders relating to lots, including descriptions in the catalogue, condition reports or elsewhere are statements of M&E's opinion and not representations of fact. Estimates may not be relied on as a prediction of the selling price or value of the lot and may be revised from time to time at M&E's absolute discretion.

4. Exclusions and limitations of liability to Buyers
(a) M&E shall refund the Purchase Price to the Buyer in circumstances where it deems that the lot is a Counterfeit, subject to the terms of M&E's Authenticity Guarantee.

(b) Subject to Condition 4(a), neither M&E nor the Seller:-
(i) is liable for any errors or omissions in any oral or written information provided to Bidders by M&E, whether negligent or otherwise;
(ii) gives any guarantee or warranty to Bidders and any implied warranties and conditions are excluded (save in so far as such obligations cannot be excluded by English law), other than the express warranties given by the Seller to the Buyer (for which the Seller is solely responsible) under the Conditions of Business for Sellers;
(iii) accepts responsibility to Bidders for acts or omissions (whether negligent or otherwise) by M&E in connection with the conduct of auctions or for any matter relating to the sale of any lot.

(c) Without prejudice to Condition 4(b), any claim against M&E and/or the Seller by a Bidder is limited to the Purchase Price for the relevant lot. Neither M&E nor the Seller shall be liable for any indirect or consequential losses.

(d) Nothing in Condition 4 shall exclude or limit the liability of M&E or the Seller for death or personal injury caused by the negligent acts or omissions of M&E or the Seller.

5. Bidding at Auction
(a) M&E has absolute discretion to refuse admission to the auction. Before sale, Bidders must complete a Registration Form and supply such information and references as M&E requires. Bidders are personally liable for their bid and are jointly and severally liable with their principal, if bidding as agent (in which case M&E's prior express consent must be obtained).

(b) M&E advises Bidders to attend the auction, but M&E will endeavour to execute absentee written bids provided that they are, in M&E's opinion, received in sufficient time and in legible form.

(c) When available, written and telephone bidding is offered as a free service at the Bidder's risk and subject to M&E's other commitments; M&E is therefore not liable for failure to execute such bids. Telephone bidding may be recorded.

6. Import, Export and Copyright Restrictions
M&E and the Seller make no representations or warranties as to whether any lot is subject to import, export or copyright restrictions. It is the Buyer's sole responsibility to obtain any copyright clearance or any necessary import, export or other licence required by law, including licenses required under the Convention on the International Trade in Endangered Species (CITES).

7. Conduct of the Auction
(a) The auctioneer has discretion to refuse bids, withdraw or re-offer lots for sale (including after the fall of the hammer) if (s)he believes that there may be an error or dispute, and may also take such other action as (s)he reasonably deems necessary.

(b) The auctioneer will commence and advance the bidding in such increments as (s)he considers appropriate and is entitled to place bids on the Seller's behalf up to the Reserve Price for the lot, where applicable.

(c) Subject to Condition 7(a), the contract between the Buyer and the Seller is concluded on the striking of the auctioneer's hammer.

(d) Any post-auction sale of lots shall incorporate these Conditions of Business.

8. Payment and Collection
(a) Unless otherwise agreed in advance, payment of the Purchase Price is due in pounds sterling immediately after the auction (the "Payment Date")

(b) Title in a lot will not pass to the Buyer until M&E has received the Purchase Price in cleared funds. M&E will generally not release a lot to a Buyer before payment. Earlier release shall not affect passing of title or the Buyer's obligation to pay the Purchase Price, as above.

(c) The refusal of any licence or permit required by law, as outlined in Condition 6, shall not affect the Buyer's obligation to pay for the lot, as per Condition 8(a).

(d) The Buyer must arrange collection of lots within 10 working days of the auction. Purchased lots are at the Buyer's risk from the earlier of (i) collection or (ii) 10 working days after the auction. Until risk passes, M&E will compensate the Buyer for any loss or damage to the lot up to a maximum of the Purchase Price actually paid by the Buyer.

M&E’s assumption of risk is subject to the exclusions detailed in Condition 5(d) of the Conditions of Business for Sellers.

(e) All packing and handling of lots is at the Buyer's risk. M&E will not be liable for any acts or omissions of third party packers or shippers.

9. Remedies for non-payment
Without prejudice to any rights that the Seller may have, if the Buyer without prior agreement fails to make payment for the lot within 5 working days of the auction, M&E may in its sole discretion exercise 1 or more of the following remedies:-

(a) store the lot at its premises or elsewhere at the Buyer's sole risk and expense;

(b) cancel the sale of the lot;

(c) set off any amounts owed to the Buyer by M&E against any amounts owed to M&E by the Buyer for the lot;
(d) reject future bids from the Buyer;
(e) charge interest at 4% per annum above Lloyds TSB Bank plc Base Rate from the Payment Date to the date that the Purchase Price is received in cleared funds;
(f) re-sell the lot by auction or privately, with estimates and reserves at M&E’s discretion, in which case the Buyer will be liable for any shortfall between the original Purchase Price and the amount achieved on re-sale, including all costs incurred in such re-sale;
(g) Exercise a lien over any Buyer’s Property in M&E’s possession, applying the sale proceeds to any amounts owed by the Buyer to M&E. M&E shall give the Buyer 14 days written notice before exercising such lien;
(h) commence legal proceedings to recover the Purchase Price for the lot, plus interest and legal costs;
(i) disclose the Buyer’s details to the Seller to enable the Seller to commence legal proceedings.

10. Failure to collect purchases
(a) If the Buyer pays the Purchase Price but does not collect the lot within 20 working days of the auction, the lot will be stored at the Buyer’s expense and risk at M&E’s premises or in independent storage.
(b) If a lot is paid for but uncollected within 6 months of the auction, following 60 days written notice to the Buyer, M&E will re-sell the lot by auction or privately, with estimates and reserves at M&E’s discretion. The sale proceeds, less all M&E’s costs, will be forfeited unless collected by the Buyer within 2 years of the original auction.

11. Data Protection
(a) M&E will use information supplied by Bidders or otherwise obtained lawfully by M&E for the provision of auction related services, client administration, marketing and as otherwise required by law.
(b) By agreeing to these Conditions of Business, the Bidder agrees to the processing of their personal information and to the disclosure of such information to third parties world-wide for the purposes outlined in Condition 11(a) and to Sellers as per Condition 9(i).

12. Miscellaneous
(a) All images of lots, catalogue descriptions and all other materials produced by M&E are the copyright of M&E.
(b) These Conditions of Business are not assignable by any Buyer without M&E’s prior written consent, but are binding on Bidders’ successors, assigns and representatives.
(c) The materials listed in Condition 11(a) set out the entire agreement between the parties.
(d) If any part of these Conditions of Business be held unenforceable, the remaining parts shall remain in full force and effect.
(e) These Conditions of Business shall be interpreted in accordance with English Law, under the exclusive jurisdiction of the English Courts, in favour of M&E.

Morton & Eden Ltd.’s Authenticity Guarantee

If Morton & Eden Ltd. sells an item of Property which is later shown to be a “Counterfeit”, subject to the terms below Morton & Eden Ltd. will rescind the sale and refund the Buyer the total amount paid by the Buyer to Morton & Eden Ltd. for that Property, up to a maximum of the Purchase Price.

The Guarantee lasts for two (2) years after the date of the relevant auction, is for the benefit of the Buyer only and is non-transferable.

“Counterfeit” means an item of Property that in Morton & Eden Ltd.’s reasonable opinion is an imitation created with the intent to deceive over the authorship, origin, date, age, period, culture or source, where the correct description of such matters is not included in the catalogue description for the Property. Property shall not be considered Counterfeit solely because of any damage and/or restoration and/or modification work (including, but not limited to, traces of mounting, tooling or repatinating). Please note that this Guarantee does not apply if either:-

(i) the catalogue description was in accordance with the generally accepted opinions of scholars and experts at the date of the sale, or the catalogue description indicated that there was a conflict of such opinions; or
(ii) the only method of establishing at the date of the sale that the item was a Counterfeit would have been by means of processes not then generally available or accepted, unreasonably expensive or impractical; or likely to have caused damage to or loss in value to the Property (in Morton & Eden Ltd.’s reasonable opinion); or
(iii) there has been no material loss in value of the Property from its value had it accorded with its catalogue description.

To claim under this Guarantee, the Buyer must:-

(i) notify Morton & Eden Ltd. in writing within one (1) month of receiving any information that causes the Buyer to question the authenticity or attribution of the Property, specifying the lot number, date of the auction at which it was purchased and the reasons why it is believed to be Counterfeit; and
(ii) return the Property to Morton & Eden Ltd. in the same condition as at the date of sale and be able to transfer good title in the Property, free from any third party claims arising after the date of the sale.

Morton & Eden Ltd. has discretion to waive any of the above requirements. Morton & Eden Ltd. may require the Buyer to obtain at the Buyer’s cost the reports of two independent and recognised experts in the relevant field and acceptable to Morton & Eden Ltd. Morton & Eden Ltd. shall not be bound by any reports produced by the Buyer, and reserves the right to seek additional expert advice at its own expense. In the event Morton & Eden Ltd. decides to rescind the sale under this Guarantee, it may refund to the Buyer the reasonable costs of up to two mutually approved independent expert reports, provided always that the costs of such reports have been approved in advance and in writing by Morton & Eden Ltd.
